

Bridge that connects us

Our NGO, Association of Folk Artists of Palocland, works in Szécsény, Hungary. Some of our members are engaged in lace-making.

For 7th time in 2012 we organized an International lace conference and exhibition. Our partners are lace-making NFOs and clubs in Bobowa (Poland) and Roznava (Slovakia). During our network collaboration we visit each other's events and fill these event up with professional content in Szécsény (HU), Roznava (SK) and Bobowa (PL).

As a result of our years of collaboration, in 2011 there was a need expressed for the preparation of a joint work, which was presented at the International event of OIDFA in Caen, France. The work was named "Bridge that connects us".

In appearance it symbolizes the possibility of international co-thinking and co-working, the transmission of cultures and values.

We would like to offer the possibility of connecting to us also to other nations. The condition of connecting is to keep the given

parameters for creation of sample-scarf that express the lace culture and typical ornaments of their region.

After the completion of the basic work the connected nation becomes shareholder (co-owner), gets rights to present the work, and has the task to organize new partners.

Connection points are: Szécsény (HU), Roznava (SK) and Bobowa (PL).

The manager and caretaker of the work remains the Hungarian association (HU-3170 Szécsény, Ady Endre út 4.), which is also responsible for coordination of collaboration as well. We hope, that creative communities of many nations will use the option, join our call for collaboration and cooperation.

Szécsény, 2012-09-26
